

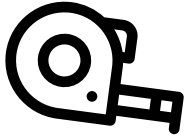

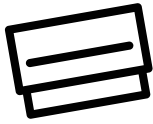

# GRAPHICS APPLICATION GUIDE

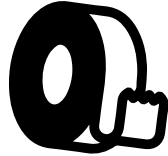

What you will need to get started:

Tape Measure

Squeegee

Tape

Methylated Spirits

Sharp Knife

Clean Cloth

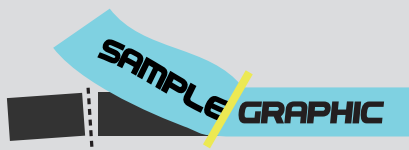

Please note that this is a general guide for application. If you require more in depth guidance, please try Youtube for tutorials or give us a call!

## 1. CLEAN

Make sure the surface is clean and free of grease and dirt.

## 4. PEEL

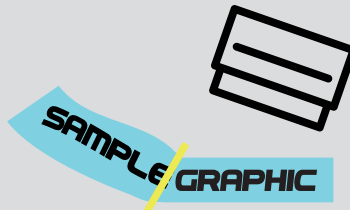

Begin to peel the graphic from the backing paper and cut the backing paper away that you have exposed making sure not to let the graphic touch the surface.

## 2. MEASURE

Tape your graphic in place, making sure that it is level.

## 5. APPLY

Keep the graphic taut and start to apply pressure with the squeegee working from the centre outwards making sure that the vinyl doesn't bubble or kink.

## 3. TAPE

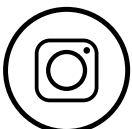

Place additional tape through the centre of the graphic.

## 6. FINISH

Repeat the process for the other half of your graphic. If you do have bubbles in your application, simply use your sharp knife to prick a small hole and push the air out.
